Objective

A professional game developer seeking technical design roles, with a focus in gameplay mechanics and systems design. Recently finished work on the highly anticipated Fable, working within the quest team to create the main quest-line and related gameplay features using proprietary tools. Previously graduated from the University of Staffordshire with a MSc Computer Games Design degree (First-Class Honors).

Skills & Tools

Design

Game design documentation
Technical documentation
Gameplay systems design
3Cs design
Prototyping & balancing
Audio systems

Programming

Systems implementation
Visual scripting (Blueprints)
C# & C++ languages
'raylib' C++ library
HTML & CSS

Engines/Tools

Unreal Engine 4/5
Unity Engine
ForzaTech

Project Management

Azure DevOps
Jira & Confluence
Trello
Perforce
Git

Software

3DS Max/Maya
Substance Designer/Painter
Adobe Photoshop/Illustrator
Adobe Premier/After Effects
FL Studio
Microsoft Office

Soft Skills

Clear communication
Self-management
Demonstrating concepts
Proposals and presentation
Teamwork oriented
Empathetic listener
Leadership
Drive for personal growth

Work Experience & Projects

Fable, Playground Games

Associate Technical Designer

September 2024 – July 2026

- AAA open-world action role-playing adventure game title in the Fable series.
- Developed using an internal proprietary game engine and tools for Xbox, Windows PC and PlayStation 5.
- Working with direction, gameplay design & engineering and art teams to produce content/features across the game's quests.

Into The Abyss, Team Feast

Project Lead, Design & Development

March 2024 – August 2024

- Card-based tactics adventure game designed for a casual audience.
- Developed in Unreal Engine 5.2 for Windows PC.
- Winner of 1st place 'Best Team' at the Game Republic Showcase 2024.
- Showcases scalable complex gameplay systems suitable for a large scale project.

Staffsverse, Staffordshire University

Lead Designer & Supporting Environment Artist

July 2022 – June 2024

- Virtual recreation of the University of campuses in Stoke and London.
- Developed in UEFN for cross-platform.
- Winner of TIGA 2022 Education Initiative and Talent Development Award.

Companion Plus – Developer

September 2022 – July 2023

- Virtual pet simulator that links to real-world pet dog via hardware in special dog collar.
- Hardware in pet collar device gamifies pet steps during walks, tracked via software.
- Developed in Unity 2021 LTS for Android.
- [Updated a plugin by Christophe Geske](#) for project use.

Education

University of Staffordshire – MSc Computer Games Design (First-Class Honors)

September 2023 – August 2024

- Systems Design, Advanced Games Design & Project Management (Unreal 5.2)
- Advanced Rapid Games Prototyping (Unity)

University of Staffordshire – BSc Computer Games Design (First-Class Honors)

September 2020 – July 2023

- Technical Games Design (Unreal 5.0.3)
- 3D Games Design & Development (Unreal 4.27)
- Advanced Rapid Games Prototyping (Unity)
- 3D Environment Modelling for Games (Substance, 3DS Max, ZBrush)

University of Staffordshire – Masterclass in Design Thinking for Digital Innovation

August 2022

- Identifying customer avatars for concepting products
- Masterclass on developing an entrepreneurial mindset
- Covering how to create a start-up business

University of Chester – HNC Design & Animation

September 2014 – July 2015

- Modelling & Animation for Games
- Film & TV Studies
- Life Drawing classes

Achievements

Best Team category,
Game Republic
Showcase 2024

MSc Design category,
Staffs University
GradEx 2024

Game Tech category,
Game Republic
Showcase 2023

- Technical Design for the 1UP Scheme at Staffordshire University, nominated for 'Best Education Initiative' in 2022, and shortlisted for 'Best Puzzle Game' and 'Best Arcade Game' in 2023.
- Raised funds for Macmillian Cancer Support in July 2022.
- Moved the Shadow Foam business from hand-cut products to CAD and laser cut products, drastically decreasing manufacture times throughout 2018.
